Professional Summary

Software Engineer with 5+ years of experience in backend and full stack development, specializing in Node.js, cloud-native systems, REST APIs, distributed architectures, and enterprise-grade applications. Proven in designing scalable APIs, optimizing cloud infrastructure, improving application performance, and delivering production-ready solutions across AWS, GCP/Firebase, web, and mobile ecosystems.

Technical Skills

Languages: JavaScript, TypeScript

Backend: Node.js, Express.js, REST APIs, Firebase Cloud Functions

Frontend: Angular, Ionic, Capacitor, React.js

Cloud & DevOps: AWS, GCP/Firebase, Docker, GitHub Actions, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Firestore, DynamoDB, Redis, BigQuery

Architecture: Microservices, Distributed Systems, Event-Driven Design, RabbitMQ, Scalable API Design

Testing & Tools: Cypress, Git, Firebase CLI, AWS CloudWatch

Professional Experience

Rigved Infotech — Software Engineer

Jul 2025 – Present

iSITE (BoG Global) — Enterprise HSE / Safety Mobile Platform

Angular, Ionic, Capacitor, TypeScript, Firebase, Firestore, GCP API Gateway, Node.js, Express.js, BigQuery, Redis, Cypress, GitHub Actions

- Built and maintained scalable backend services on Firebase Cloud Functions (Node.js/Express), delivering 50+ REST APIs for users, observations, actions, badges, leaderboards, and notifications.
- Migrated mobile backend traffic to GCP API Gateway with Firebase Authentication, service-account verification, and feature-flag-based routing.
- Developed cross-platform mobile apps (Ionic, Angular, Capacitor) with geolocation check-in, QR scanning, push notifications, offline sync, and multilingual support (EN/FR).
- Integrated enterprise iCare REST APIs for bi-directional sync of observations and actions via Firestore triggers, scheduled jobs, and batch processing.
- Managed Dev, QA, and Production environments; Firestore deployments, data migrations, operational tooling, and BigQuery reporting integrations.
- Implemented Cypress E2E automation and GitHub Actions CI/CD to improve release reliability and deployment quality.

Route Mobile Limited — Software Developer

Feb 2024 – Jun 2025

Node.js, AWS Lambda, API Gateway, DynamoDB, CloudWatch, Docker, ECR, REST APIs

- Enhanced microservices and AWS infrastructure (Lambda, API Gateway, S3, DynamoDB) to improve scalability.
- Optimized REST APIs and database queries, reducing response latency and improving backend performance.
- Implemented RBAC for parent-child account management and secure authorization workflows.
- Migrated Node.js applications from EC2 to AWS Serverless (Lambda, API Gateway, ECR, DynamoDB), reducing infrastructure costs and improving deployment velocity.
- Resolved production bottlenecks and strengthened observability with AWS CloudWatch logging and monitoring.

Synergy Technology Services Pvt Ltd — Software Engineer

Apr 2021 – Jan 2024

Node.js, Express.js, React.js, MongoDB, MySQL, PostgreSQL, Docker, RabbitMQ, Redis

- Designed scalable API-centric backends using modular architecture and microservices patterns.
- Optimized API response times and database performance through indexing, query tuning, and backend refactoring.
- Led backend delivery on multiple client projects; collaborated with frontend teams on API design and integration.
- Drove code reviews, testing, and performance initiatives to maintain production stability and engineering standards.

Selected Projects

Enterprise HSE & Safety Platform (iSITE): 50+ REST APIs, cross-platform mobile, Firestore triggers, BigQuery reporting, offline sync, CI/CD (Angular, Ionic, Firebase, GCP API Gateway, Node.js).

AWS Serverless Migration: EC2 to Lambda/API Gateway; Docker/ECR; CloudWatch; reduced cost and improved scalability (Node.js, AWS).

ONDC Logistics Platform: Beckn protocol integrations, queue-based order lifecycle automation (Node.js, RabbitMQ, Redis, MySQL, React).

Education

Bhavans College, Mumbai — B.Sc. Information Technology

Jun 2017 – May 2020

CGPI: 9.05
